

Match the Leaves!

Deciduous leaves come in many shapes. They can be shaped like circles, ovals, hearts, or even hands. Look at the edges of the leaves below. Are they smooth or bumpy? Are the leaves round? Do they have pointy parts? Draw a line from each picture to the one that looks exactly alike.

Learn more about nature with *PBS Kids Look and Learn Nature Detective*. This kit comes with a book, a magnifying glass, a portable laminated scavenger hunt (perfect for nature walks!), and an activity poster.
